Summary

Detail-oriented and analytical Computer Science student with hands-on experience in **manual testing, debugging, and SDLC practices**. Skilled in understanding requirements, creating **test scenarios and test cases**, executing tests, and reporting defects with clear documentation. Familiar with tools like **Jira**, API testing using **Postman**, and basic **SQL queries**. Passionate about ensuring software quality and delivering bug-free user experiences.

Technical Skills

Testing: Manual Testing, SDLC, STLC, Test Case Design, Bug Lifecycle, Regression Testing, Sanity Testing

Tools: Jira (basic), Postman, Git, GitHub

Languages: Python, Java, JavaScript, SQL

Backend & APIs: REST APIs, FastAPI (basic), JSON

Web: HTML, CSS, React.js

Databases: MySQL, PostgreSQL

Cloud: AWS (EC2, S3), Google Cloud

Other: API Testing, Debugging, Problem-Solving

Experience

Software Development Intern

Jan 2026 – Ongoing

Femira (by Meraji), Indore

- Developed and optimized 10+ frontend and backend features, improving application performance and reducing UI latency by approximately 25%.
- Collaborated in Agile SDLC cycles including requirement analysis, debugging, testing, and deployment workflows.
- Designed and integrated REST APIs for handling dynamic user requests and backend data flow.
- Automated repetitive workflows, reducing manual effort by nearly 30% and improving system efficiency.
- Used Git and GitHub for version control, collaboration, and maintaining production-ready codebases.

Projects

Synapse – AI-Powered Last-Mile Delivery Platform [\[GitHub\]](#) [\[Live\]](#)

Aug 2025 – Oct 2025

React.js, Next.js, Tailwind CSS, REST APIs, SQLModel, Leaflet.js

- Developed a full-stack delivery system supporting 500+ simulated users with real-time tracking.
- Built backend services using FastAPI for handling real-time order processing and API communication.
- Optimized API response time by approximately 20% through efficient data handling and architecture.

MEDIBOT—AI-Enabled Teleconsultation System [\[GitHub\]](#)

Jul 2024 – Aug 2024

React.js, Next.js, Tailwind CSS, AI/NLP concepts, REST APIs

- Developed a responsive teleconsultation platform to enable seamless remote communication and improve healthcare accessibility.
- Enhanced user interaction through intuitive UI/UX design, optimizing navigation, responsiveness, and cross-device usability.
- Improved system performance and reliability by refining architecture and ensuring smooth data flow across the application.

Achievements

- Secured Top 20 position in GrabHack among national-level teams (Top 5% participants).
- AWS Certified Cloud Practitioner.
- IBM Generative AI Certification.
- Oracle OCI Generative AI Professional Certification.

Extracurricular

- General Secretary, Edu4U Club – Led and managed a team of 50+ members, organizing academic and technical events.
- Student Coordinator – TCS Recruitment Process, gaining exposure to hiring workflows and candidate evaluation.
- Participated in national-level hackathons including SIH, EY, Amazon, Myntra, Adobe, and TVS challenges.
- Completed Virtual Internship in Generative AI (Google Cloud) by SmartBridge & SmartInternz, gaining hands-on experience with AI workflows and cloud-based tools.
- Developed understanding of model validation, prompt engineering, and ensuring accuracy of AI-generated outputs.

Education

B.Tech in Computer Science and Engineering (Cloud Computing & Automation)

Vellore Institute of Technology

2022 – 2026

CGPA: 7.84
